

The heatmap displays the distribution of player totals for each player number (1-9) across the 2019-2020 Premier League season. The y-axis, 'Player total', ranges from 12 to 21. The x-axis, 'Player number', ranges from 1 to 9. The color scale indicates the frequency of player totals, with red representing higher frequencies and blue representing lower frequencies. The visualization shows a complex pattern of red and blue cells, indicating that player totals are not uniformly distributed across player numbers.
