

The heatmap displays a grid of colored squares representing data points for the 1000000th iteration. The x-axis, labeled 'Player total', has major ticks at 1, 2, 3, 4, 5, 6, 7, 8, and 9. The y-axis, also labeled 'Player total', has major ticks at 12, 13, 14, 15, 16, 17, 18, 19, 20, and 21. The color scale ranges from dark blue (low values) to dark red (high values). The plot shows a complex, non-uniform distribution of values across the grid.
