

A 10x10 grid visualization of the character 'a'. The grid uses a color scale where dark purple represents low density and yellow represents high density. The character 'a' is clearly visible in the center-right area of the grid, with its main body in yellow and its vertical stroke in a lighter shade of purple.

Heatmap visualization of the 2019-2020 season data. The y-axis represents the 'Player total' (ranging from 12 to 21), and the x-axis represents the categories (ranging from 1 to 9). The color scale indicates values, with red representing higher values and blue representing lower values.
